

Cable Management Solutions

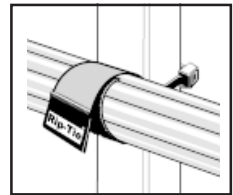

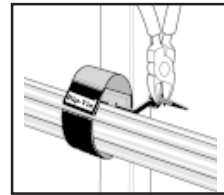

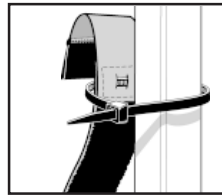

CableHanger®

- Attaches with Cable Tie for Permanent Mounting
- Will Not Damage Cables
- Many Colors & Sizes
- Reusable
- Quick Installation
- Safely Suspends Sensitive Cables under Floors or against Walls

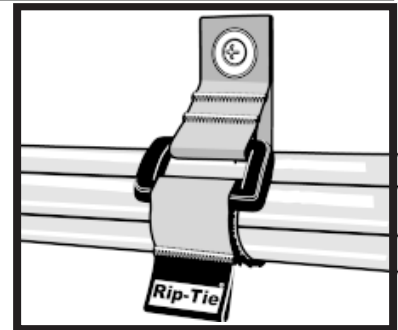

The CableHanger allows you to suspend sensitive wires and cables from vertical posts - under floors, or inside walls - without crimping or accidental cutting. The patented design locks the CableHanger firmly onto posts and the Velcro strap can be used over and over again.

- 1 Thread nylon tie
- 2 Secure tie to post
- 3 Remove excess tie
- 4 Bundle Cables

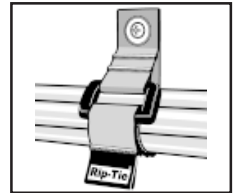

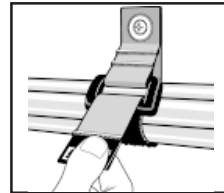

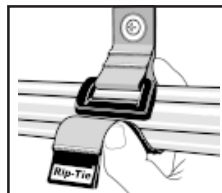

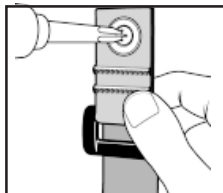

Grommeted CinchStrap®

- Allows for cable suspension at any level
- Buckle cinch arrangement makes them reusable and fast
- Grommet holes for superior holding strength

The Grommeted CinchStrap suspends large, hard to manage cable bundles including Voice, RG58, Cat 5 and fiber. Attaches to wooden or steel beams, joists, ceilings, walls and more...

- 1 Attach to wall
- 2 Wrap Cables
- 3 Buckle & tighten
- 4 Secure

Cinch It, Don't Pinch It!

Rack Organizer®

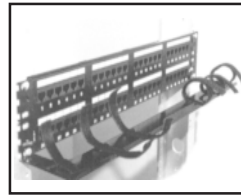

- Reusable
- Will Not Damage Cables
- Single Handed Operation
- Easy to Install
- No Rack Space Needed
- Saves Time & Effort
- Preserves Cable Integrity
- No Need to Move Existing Panels

The Rack Organizer is ideal for new or retrofit installations due to it's ease of use. The Rack Organizer fits most equipment by using a standard rack screw hole pattern enabling installation for any rack mount device. It saves space by supporting cables in front of rack while maintaining port accessibility. More than one Rack Organizer can be used on top of each other and even upside down. Best of all the Velcro straps are custom positionable and are designed for one handed operation.

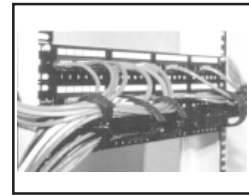

1 Back off screws

2 Slide in Rack Organizer

3 Retighten screws

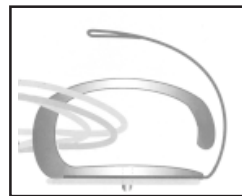

PolyFiber Optic Ring from Leviton®

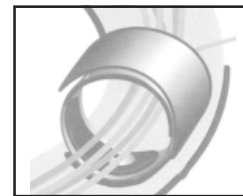

- Maintains Proper Bend Radius
- Reusable
- Prevents kinking
- Available in 12 & 24 inch sizes

The PolyFiber Optic Ring maintains the fiber optic cable's minimum bend radius of 20x cable diameter. When more cable is required, it can be simply released from the ring. The Inside Plant (12") ring allows up to 40 ft of excess cable storage and the Outside Plant (24") ring allows up to 30 ft of excess cable storage.

1 Wrap

2 Secure
